WEIGHT WITH PACKAGING (KG)	10.0

Over a metre diagonal size, Full HD picture and smart features

The **ECG 43FSL231** smart TV boasts a diagonal size of **108 cm (43 inches)**. It's big enough to draw you into the action while you watch movies, but it doesn't take up too much space at home. It will do a great job in your living room, but also in your bedroom or even at the cottage.

No matter where you put it, this TV will blow your mind with its stunning **Full HD** picture, **fine-tuned sound**, as well as a wide range of **smart features**. It provides great audio-visual entertainment with both classic TV programmes and web content from popular streaming platforms.

Visually stunning

Sharp details, vibrant colours and excellent contrast in both dark and light parts of the scene. The 43-inch screen provides all this while you watch movies, TV shows and sports. It boasts a superb **Full HD** resolution (1920×1080 px), advanced **Direct LED** backlight and **high dynamic range (HDR10, HLG)** support.

To top it all off, the sharpness of the visual presentation is further enhanced by the **Progressive Scan** technology. Thanks to this improvement, the image is not displayed interlaced (in half-frames), but always straight through and feels more fluent.

Smart audio-visual entertainment

In addition to the possibility of watching classic TV programmes from **terrestrial, cable and satellite** (DVB-T2/C/S2 tuners) signals, the ECG 43FSL231 opens the door to plenty of other audio-visual entertainment. It can be connected to the internet (via cable and **LAN** connector as well as wireless via **Wi-Fi**) and is equipped with a clear **Linux** operating system. This will offer you a range of modern smart features that suit every member of your family – there are plenty of popular applications, including **YouTube, Netflix** or **Amazon Prime Video**.

The **mirroring function** is very practical, allowing you to easily stream content from your smartphone or tablet to the TV screen.

High quality sound system

The ECG TV complements the fine-tuned picture of movies, hockey or football matches and evening news with very decent sound. Its audio system takes care of this with **integrated speakers** that operate at **2×8 W**. With the handy **equalizer**, you can adjust the sound to the best possible experience of the programme you are watching. Thanks to an **optical audio output**, you can connect external home cinema speakers to take the sound coming out of your TV to an even higher level.

When you don’t want to disturb your surroundings while watching TV, you can also **connect headphones** to the device and listen to the sound in privacy.

Ready to connect

In addition to the aforementioned optical audio output and headphone jack, the 43-inch ECG TV also offers **2 HDMI ports** so you can easily connect a laptop, Blu-ray or DVD player, a game console or, thanks to the ARC technology, a soundbar. As the device’s connector includes the **USB** interface, you can also play your own media from portable flash drives – many video, audio and image formats are supported.

Delighting small features

The ECG 43FSL231 is also equipped with a number of small features that can make it easier to use in both normal and non-standard situations. The first category includes the **channel list** and the **Electronic Programme Guide (EPG)** – a pair of functions that give you a perfect overview of your tuned channels and their current programme. More specific features include a **parental lock** (for better control over what your children are watching) and a basic **hotel mode** which you can use to copy the channel list to multiple TVs.

The elegant feet supplied with the TV allow it to be placed on a table or cabinet. If you prefer to hang it on the wall, however, you'll appreciate the **holder mount** set-up.
