Grilling you will enjoy

With the **ECG FORZA 8200 Master** contact grill, you can prepare meat, fish, vegetables, sandwiches and crispy panini at home with greater confidence. Its **2000 W** power ensures fast heating and enough performance even for a proper steak. You can use the grill closed, with the upper plate raised, or open it up to **180°**. This gives you more space for a family dinner, a quick lunch or relaxed weekend grilling at home.

Programs, icons and precise control

The control panel looks modern and remains easy to understand. The display shows the upper and lower plate settings, cooking time and colourful food icons that quickly guide you to the right program. Programs are available for vegetables, bacon, sausages, sandwiches, potatoes, chicken, shrimps, fish, tomatoes and steaks. For steaks, the doneness levels from **Rare** to **Well Done** make preparation simpler, clearer and more enjoyable.

Temperature tailored to every dish

Manual settings let you adapt the heat to the food you are preparing within a range of **80–230 °C**. You can set the temperature for the upper plate, the lower plate or both plates, giving you better control over the result. A practical timer helps you watch the cooking time, and after preheating the grill lets you know when to insert the food. The equipment also includes a **meat temperature probe**, which helps check the temperature inside the meat, while the **SEAR** function quickly sears the surface and helps keep it juicy.

Large surface and easy cleaning

The **34 × 23 cm** grilling surface offers enough space for several portions at once. **Removable grilling plates** with a non-stick coating make preparation and cleaning easier, while the drip tray collects excess fat and juices. Everyday use is supported by a heat-insulated handle, opening lock and non-slip feet for better stability. ECG FORZA 8200 Master is a well-designed home grill for anyone who wants more control over the final result.
