

ECG AH D501 T

Air humidifier

Product code: 100000474253
EAN: 8592131307308

- Ultrasonic Humidifier
- Humidifier output 300 ml/hour
- 5-litre water tank
- HEPA filter & active carbon filter

- Ultrasonic Humidifier
- High frequency ultrasound oscillator (2.4 MHz)
- Two humidifying levels (Hi/Low)
- HEPA filter & active carbon filter inside to purifier the air
- Very quiet operation. Suitable for bedrooms
- Operating time of 15 hours without the need to refill water
- Comfortable control panel
- Automatic shut-off protection with warning when waterless
- Automatic shut-off protection when take off the water tank
- Easy to clean
- Integrated body design for noise suppression, super quiet when operating
- Ceramic glass glaze transducer, can resist water scale effectively to prolong useful life
- With aroma diffuser function
- Ionization cool mist
- Remote control
- 1,4 m power cord length
- Nominal voltage: 100–240 V ~ 50/60 Hz
- Nominal input power: 27 W
- Noise level: 38 dB
- Water container capacity: 5 l
- Liquid consumption for humidification per 1 hour: ≥300 ml/hr.
- Controller: battery CR2025, 3V DC (included)

Technical specification

Input power (W)	27
Power supply (V)	Power cord
Power cord length (cm)	1,4
Fuse	Yes

Product specification

Type	Digital
Water capacity (l)	5
Humidity power	300 ml/h
Humidity time	15 h
Timer	Yes
Water filter	carbon filter
Air filter	HEPA H11
Aromatization	Yes
Power light indicator	Yes
Removable water tank	Yes

Design

Colour	White

Accessories

Remote control	Yes

Weight & dimensions

WIDTH (MM)	240
HEIGHT (MM)	371
LENGTH (MM)	117
WEIGHT (KG)	2.4

Weight & dimensions (Brutto)

WIDTH WITH PACKAGING (MM)	285
HEIGHT WITH PACKAGING (MM)	405
DEPTH WITH PACKAGING (MM)	215
WEIGHT WITH PACKAGING (KG)	3.1

No more dry cough with ECG AH D501 T

Do you know how you find out that you have dry air at home? Dry throat, irritated skin and eyes, cough, chapped lips, sinus pain and allergies can be caused by low humidity in the home. Don't worry; it's not always a health problem that you need to discuss with a doctor right away. The cause might be really simple and the solution as well. Your home air is too dry. The simple and permanent solution is to purchase a humidifier. The ultrasonic humidifier **ECG AH D501 T** with humidification capacity 300 ml/h working on the principle of high frequency ultrasound oscillator will provide a perfect service for you and your health. After purchasing it, you will really feel at home again, as in a really comfortable place.

Very easy setting

Depending on your needs and preferences you can choose from **two levels of performance** humidification – Hi (high), Low (low). The ECG humidifier produces cold steam, which does not affect the room temperature. So you don't have to worry about unnecessary heating in the cold months.

The **Intuitive control panel** is accommodating to each user. You deserve the best and that's what you can see in the controls. You can easily turn on the device and set the desired function. You can try for example the **ionization** or the **aroma diffuser** function. In addition to optimal humidity, you will also have clean and perfectly scented air at home.

Up to 15 hours of humidification

ECG AH D501 T has an extra large water tank with a capacity of 5 litres. It can adjust the air in you home for up to **15 hours**, without having to refill the tank.

You can as well stop thinking about the refill. The ECG humidifier switches off when the tank is empty and alerts you to refill it. If you forget to switch off the appliance before removing the water tank, **it will turn off automatically**.

High quality filtration

The humidifier is also equipped with a top triple filtration. It contains a replaceable HEPA filter 11, an active carbon filter, a Pre-filter and, as a bonus, a water filter. Thanks to the HEPA filter, the humidifier also serves as a mini air purifier, as it is primarily a matter of filtering a large amount of dust from the air. The entire filter space is the same size as the one for humidification.

Even though the humidifier is relatively small, it can process air in rooms with an area of 30 to 35 m2. Its long service life is ensured by the converter with a ceramic glaze treatment preventing the formation of lime scale. Cleaning is therefore very easy.

Suitable also for a bedroom

The ECG humidifier boasts a robust construction. It does not vibrate during operation and will **not disturb you** when you are watching TV or sleeping. The noise level does not exceed 38 dB. Just to give you an idea, a very quiet conversation reaches a noise level of 40 dB.

The included **remote control** provides a real comfort. Therefore, you can control the device from the comfort of your couch and do not have to get up from your favourite show to change the settings. The remote control is powered by the included CR2025 battery. So you don't have to run to the store right away to get a new one.

You are also not too limited by the location of the electrical outlet. Thanks to the 1.4 m long power cable, you can place the humidifier literally anywhere.
