

ECG AH M351

Air humidifier

Product code: 100000474240
EAN: 8592131307292

- Ultrasonic Humidifier
- Humidifier output 300 ml/hour
- 3.5-litre water tank
- High quality water filter

- Ultrasonic Humidifier
- High frequency ultrasound oscillator (2.4 MHz)
- Adjustable mist capacity from low to high
- High quality Water filter
- Very quiet operation. Suitable for bedrooms
- Operating time of 10 hours without the need to refill water
- Automatic shut-off protection with warning when waterless
- Automatic shut-off protection when take off the water tank
- Easy to clean
- Integrated body design for noise suppression, super quiet when operating
- Ceramic glass glaze transducer, can resist water scale effectively to prolong useful life
- With aroma diffuser function
- 1,4 m power cord length Nominal voltage: 100–240 V ~ 50/60 Hz
- Nominal input power: 25 W
- Noise level: 38 dB
- Water container capacity: 3.5 l
- Liquid consumption for humidification per 1 hour: ≥300 ml/hr.

Technical specification

Input power (W)	25
Power supply (V)	Power cord
Power cord length (cm)	1,4
Fuse	Yes

Product specification

Type	Manual
Water capacity (l)	3,5
Humidity power	300 ml/h
Humidity time	10h
Timer	No
Water filter	Yes
Air filter	No
Aromatization	Yes
Power light indicator	Yes
Removable water tank	Yes

Design

Colour	White

Accessories

Remote control	No

Weight & dimensions

WIDTH (MM)	175
HEIGHT (MM)	286
LENGTH (MM)	200
WEIGHT (KG)	1.6

Weight & dimensions (Brutto)

WIDTH WITH PACKAGING (MM)	218

WEIGHT WITH PACKAGING (KG)	2.3

Humidifier – easy solution to health problems

Unpleasant throat, irritated eyes, cracked lips, but also allergies and coughs may not be the symptoms of a serious health problem. Dry air at home or at work can be behind all these problems. The solution is very simple, get a high-quality humidifier which will optimally **adjust humidity** in the room.

The ultrasonic humidifier **ECG AH M351** works on the principle of a high-frequency ultrasonic oscillator (2.4 MHz) and can solve your problems in a moment. You will get an invaluable helper who can take you to the comfort zone so that you feel great again.

Intuitive performance settings

The manufacturer has adapted the humidifier to the needs of all users, and therefore the level of humidification can be set very intuitively. The level setting itself is very easy. A large rotary selector at the front of the device is used for this. **Smoothly select the level** that you like.

It **produces cold steam** during humidification, which does not affect the overall temperature of the room. So you don't have to worry about heating unnecessarily.

Up to 10 hours of operation

Despite its compact dimensions, the ECG AH M351 **humidifier has an extra large water tank** with capacity of 3.5 litres. It will operate on one refill with the necessity of adding water **up to 10 hours**. The average consumption of humidifying liquid is a maximum of 300 ml in 1 hour.

You can stop thinking about refilling the water tank. If the tank becomes empty, the appliance will **automatically shut off** and alert you **to the lack of water**. For safety reasons, it also switches off automatically when the tank is removed.

The ECG humidifier is also equipped with a high **quality water filter**, which also contributes to its health benefits.

Fragrance diffuser function

A nice bonus is that you can also use the ECG AH M351 humidifier as an **fragrance diffuser**. Thanks to this function, you can scent the whole apartment with your favourite scent without having to buy another device.

A special converter with a ceramic glazed finish prevents the formation of lime scale, which significantly contributes to extending the service life of the device. You will also appreciate very easy cleaning during maintenance.

It will not disturb you even during sleep

Do you want to have wonderful night sleep? No problem! The robust construction ensures an **extra quiet operation** without unwanted vibrations. You can place the humidifier in the bedroom or in the children's room without any worries. It won't disturb you at all. The noise level does not exceed 38 dB during operation. Just to give you an idea, the noise level of a very quiet conversation is around 40 dB.

Compact dimensions

When using a humidifier, you are not limited by its location. Due to the dimensions of 28.6×20×17.5 cm, it can be placed on a bedside table, for example. Thanks to the 1.4 m long power cable, you don't even have to deal with the distance from the electrical outlet.
