Smart TV with 4K resolution

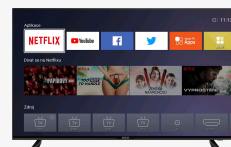

Take advantage of our offer and get your dream smart TV at a reasonable price, and with 4K resolution. The **ECG 43 US01T2S2** TV has a lot to offer you, from a 109cm screen (43") to high image resolution and smart applications to truly great sound. You will definitely have a lot of fun with this TV.

Everything is perfectly complemented by a well-thought-out elegant design with a thin black frame. Four side legs ensure perfect stability. However, if you want to hang the TV on the wall, there is no problem. Just remove the legs and use a compatible mount that complies with the **VESA 200x200 standard**.

Popular applications at your service

The comfort of using all smart functions is ensured by the **Linux operating system**, which comes with a whole range of popular smart applications. You can look forward to thousands of videos from the **YouTube** server, popular films and series from **Netflix** and audiovisual content from the **Amazon Prime Video** service.

To use all the functions of the device, you need to connect your smart TV to the Internet. You can do this in two ways - the ECG 43 US01T2S2 can communicate with **wireless Wi-Fi networks** and also supports a classic wired connection (using the RJ45/LAN connector).

DVB-T2 is a given

ECG 43 US01T2S2 is compatible with the **DVB-T2** standard and can also decode the H.265 (HEVC) image format. Thanks to this, you can rely on it even after the Czech Republic has completely switched to the new terrestrial broadcasting standard. If you do not intend to watch TV from a classic antenna, you will certainly appreciate the possibility of receiving TV programs in the **DVB-C** (cable television) and **DVB-S2** (satellite broadcasting) standards.

High-quality picture and sound

When watching your favorite movies, series or sports matches, you will enjoy high-quality picture and sound with the ECG 43 US01T2S2 television. The device works with an amazing **4K Ultra HD resolution** (3840x2160 px) and is equipped with built-in stereo speakers.

An excellent audio experience is provided by **integrated stereo speakers** with a power of 2x 8 W. Such power is more than enough for you to enjoy the great sound of an action movie or the screaming crowd of fans at a football match. The speakers have the **NICAM system** as a bonus, which perfectly smooths out the reproduced tones.

And because the device also has a classic **3.5mm jack output**, you can easily **connect headphones** to it and enjoy watching your favorite shows without disturbing those around you.

Advanced TV viewing options

This TV also supports **modern HbbTV technology**, which is why you can also access online archives of individual TV stations through it - just press the **red button** on the remote control. In addition, there are other interesting keys on the remote control for you - for example, those that allow you to access popular services like YouTube and Netflix with a single press. However, do not forget that if you want to use these functions, you must have your TV connected to the Internet.

There is no USB or HDMI

The ECG 43 US01T2S2 TV's connector equipment includes, among other things, 1x USB port, through which you can connect a flash drive or external disk to the device. You can then play your own multimedia on the TV - films, videos, photos and music.

3 HDMI connectors can be used to play audio and video formats in the highest possible resolution and to connect a DVD or Blu-ray player, soundbar, game console, PC or laptop.
