

ECG OV 1821 Black

Personal scale

Product code: 100000656335

EAN: 8592131307452

- 4 high precision strain gauge sensors
- 6 mm impact resistant safety glass
- Imperial / metric conversion
- Max. weight 180 kg

- Max. weight 180 kg
- Measures in increments of 0.1 kg
- 4 high precision strain gauge sensors
- 6 mm tempered safety glass platform

- Imperial / metric conversion
- Large LCD display (28 mm)
- Indicator of overweight
- Low battery indication

- Automatic ON/OFF
- Power: 3× 1.5 V AAA batteries (included)

Technical specification

Power supply	Cord less
Type of Battery	3 × 1.5 V AAA (included)

Product specification

Maximum load (kg)	180
Digital weight type	Yes
Measurement Accuracy (kg)	0,1
Weight (kg)	1
Surface	6 mm impact resistant safety glass
LCD display	Yes
Body water index	No
Body fat index	No
Muscle index	No
User profile settings	No
Daily Calculation of calories	No
Auto OFF	Yes
Auto ON	Yes
Non-slip	Yes

Design

Material	Glass/Plastic
Colour	Black

Weight & dimensions

WIDTH (MM)	300
HEIGHT (MM)	21
LENGTH (MM)	300
WEIGHT (KG)	1.0

Weight & dimensions (Brutto)

WIDTH WITH PACKAGING (MM)	324
HEIGHT WITH PACKAGING (MM)	33
DEPTH WITH PACKAGING (MM)	
WEIGHT WITH PACKAGING (KG)	1.5

Personal scale also as a design accessory

Many of us deal with our weight and carefully watch every extra gram. Some people, on the other hand, do not watch their weight at all, but just want to know where they are at. Whatever group you belong to, you should definitely have the personal scale at home, thanks to which you will have constant information. The fact that the scale can be an elegant addition to the interior design is proven by **ECG OV 1821** with the surface made of 6 mm thick tempered glass. The scale is only 2.1 cm high, which will make it easier to store it. It can be slid under the bed or stowed away in the closet. However, due to its **modern design** you can easily keep it in the bathroom.

It weighs with a maximum deviation of 0.1 kg

Backlit **LED display** shows the necessary information. The most important thing, of course, is the weight you display with a maximum difference of 0.1 kg. The scale is also equipped with a metric / imperial converter. That is if you happen to want to see your weight in other units. The display also shows practical indicators, which will alert **you to an overload** or **weak battery**. The maximum load capacity of the scale is 180 kg. The equipment also includes the **automatic shutoff function**. In the event of prolonged inactivity, the scale switches itself off automatically. So you don't have to worry about draining your batteries unnecessarily. It is powered by 3 × 1.5V AAA batteries, which are included in the package.
