Play tapes, CDs and flash

Do you still have classic audio cassettes at home or do you sometimes listen to some CDs? Try the **ECG CDR 999 DAB** radio cassette player, which can play music from several sources. It is equipped with a classic cassette player and a CD player that supports CD / CD-R / CD-RW discs.

However, there is also USB, to which you can connect a flash drive with a maximum capacity of 32 GB. The player can handle MP3 or WMA formats via a flash drive. For a few hours, you can listen to your favourite music or play an engaging audio book. The user's favourite equipment is complemented by a 3.5 mm stereo headphone output and a 3.5 mm AUX input - for the player / phone.

Listen to digital radio

You can tune to a wide range of radio stations with the ECG CDR 999 DAB radio cassette player. This device has a receiver, which understands the radio stations broadcasting in the classic FM band, but also with stations using **digital technology DAB/DAB+**.

A strong radio signal is ensured by high quality telescopic antenna and you will also enjoy the integrated memory, where you can save 20 most frequently listened to stations.

Power from an outlet and also from battery

The overall appearance is based on years of proven design. There is therefore also a blue backlit **display**, showing the current settings of the device. The radio cassette player is equipped with a practical handle for easy manipulation. So it will be easy to carry around.

Do you want to listen to music in the cottage without electricity? That's no problem. You can use also **battery power** beside the regular power supply. All you need is a 6 × 1.5V R14 battery (batteries are not included).
