Easy preparation of sweet desserts

Do you also love sweet desserts and fluffy sweet delicacies? But still you have not found a suitable helper that would really make their preparation easier? The perfect solution is the powerful blender **ECG RSM 4052** with 400 W power input. It adapts perfectly to any user so that its operation is as comfortable as possible.

You can use **5 speed settings**. Thanks to the rotary switch, the speeds can be smoothly regulated with one finger. A very pleasant bonus is the **TURBO** button, which activates the **Turbo Boost** function and switches the speed to maximum. You can use this function, for example, when whipping egg whites or whipping cream.

Using blender with or without the stand

The stand with a motor driven **rotating bowl** combined with anti-slip feet ensures perfect stability of the device during operation. The plastic 3.5 l bowl can hold a sufficient amount of ingredients.

A big advantage is also securing the beater in the folded position, so you do not have to worry about it falling unexpectedly. After **unlocking**, the beater can be easily removed from the stand and used as a regular hand beater.

The body of the blender is made of high quality and durable plastic, and is therefore quite light. Low weight and ergonomic handle make the handling of the device very easy. Combined with the tilting head, working with this blender will be a pleasure for you.

You can wash the accessories in the dishwasher

You will also find two whisks and two kneading hooks in the package with the **ECG RSM 4052** blender in addition to the bowl. You can easily make with its help dough for festive cakes, muffins and sweets and whip up delicious soft creams or toppings until smooth. You can replace whisks and hooks by just pressing a button. All the accessories of the blender can be washed in the dishwasher, which will save you a lot of time and work. So you can engage in more enjoyable activities.
