Electric kettle for tea lovers

Would you call yourself a real tea lover? If yes, then the **ECG RK 1891 INFUSO** electric kettle should definitely reside in your kitchen. This is not an ordinary small appliance which just heats your water – part of this kettle is also a **removable strainer**, with which you can easily and quickly conjure up your favourite beverage from tea leaves, herbs and other ingredients.

The kettle will also delight you with its attractive design, which combines **stainless steel elements** with the elegance of **tempered glass**. By purchasing this teapot, you can move the tea culture a step higher also from an aesthetic point of view.

Professional preparation of hot beverages

Forget impersonal tea bags and treat yourself to the flavours and aromas that are typical of professional tea houses. The electric ECG kettle allows you to do this using **removable stainless-steel strainer**, where you can put tea ingredients according to your taste.

Since every type of tea requires a different water temperature, our kettle offers also **electronic control** with **seven setting options (from 40 up to 100 °C)**. Whether you prefer real black tea or green tea, with the ECG kettle you can prepare your favourite beverage exactly as you need it.

It will also help with the preparation of baby food

If you have small children at home, you know very well that preparing their food takes a lot of work. However, you can make this daily routine easier with the ECG RK 1891 INFUSO kettle. Thanks to **adjustable temperature**, practical **keeping warm function** and the **light and sound signalling** the preparation of artificial breast milk, porridge and other foods is much easier.

The main vessel of our kettle is made of **heat-resistant borosilicate glass** and holds up to **1.8 litre** of water. The appliance also includes a **360° swivel base** with a retractable cable and control panel. The heating element is hidden inside the kettle.

Safe and healthy

Thanks to a **range of safety features** the use of an ECG electric kettle is always safe. For example, if you switch on the appliance without water or remove it from the base, it will automatically switch off. The same happens when the boiling point is reached. And the scalding danger is reduced by **safety button for opening the kettle**.

To keep the water for tea, coffee or baby food in perfect condition, the kettle also has a **removable and washable anti-scale filter**. In addition, its equipment includes also the **dechlorination function**, which consists of boiling for three minutes (100 °C) freeing the water from excess chlorine.
