### Smaller, but smart

Are you looking for a TV that would not take up much space in your interior, but at the same time offer modern smart functions? In that case, the **ECG 24 HS02T2S2** is exactly the device for you. Despite its **smaller size (24-inch diagonal, that is 61 cm)**, it can bring you audiovisual entertainment in many ways – besides classic TV broadcast it supports also internet services, including the popular **streaming platforms, online archives and or perhaps weather forecasting applications**.

Whether you're watching movies or having fun browsing the web for fun videos, you can always count on a sharp image. Our television works with the proven **HD resolution** (1366 × 768 px).

### Enjoy web services

Once you connect your ECG Smart TV to the Internet, things start to happen. The pre-installed **Linux** operating system provides you with an access to popular streaming services, like **Netflix, YouTube, YouTube Kids** or **Amazon Prime Video**. It will also provide you with a classic **web browser**. And to top it all off, social networks applications **Facebook** and **Twitter** are added. As if in the palm of your hand, you have content exactly to your taste directly on the TV.

The Smart TV ECG equipment also includes support for **hybrid broadcasting (HbbTV)**, i.e. the popular **red button**. With a single press, the door to the world of web content opens for you, in which you can watch older episodes of your favourite series at any time, or perhaps a broadcast of a sports match that you cannot find on regular broadcasts.

### TV broadcast three different ways

Thanks to the **triple tuner** of the **ECG 24 HS02T2S2** TV you can select where the digital broadcast signal that you watch in the comfort of your home should come from. The device supports both terrestrial broadcasting in modern **DVB-T2** standard (with **H.265/HEVC** coding), and **satellite (DVB-S2)** and also **cable box (DVB-C)**.

### Mobile content on the big screen

Since our smart TV supports also the **Screencast** function you can easily mirror content from your smartphone or tablet onto its 24-inch screen. This way, for example, you can more conveniently show your family the vacation photos that you took with your mobile phone.

### It is compatible with other devices

To connect other practical devices to your new TV set, the Smart TV ECG also offers **3 HDMI ports**. Through this interface, you can connect the TV with a game console, a soundbar and even a laptop.

In addition, the connectors of our smart TV also include **2 USB inputs**, which allow movies and other media to be played from portable flash drives.
