32 inches, Full HD resolution, as well as smart features

The **ECG 32FSL231** is an ideal choice for use as a second home TV or to please you as a cottage TV, given its popular **80 cm (32 inch)** diagonal size. Wherever it finds its place, it will delight you with a high-quality **Full HD** picture, nicely **tuned sound** and, last but not least, a wide range of **smart features**. You can look forward to great audio-visual entertainment with classic TV programmes and content from popular streaming services.

Enjoy sharp and high-contrast display

Sharp details, vibrant colours and excellent contrast in both dark and light parts of the scene. The 32-inch screen of our TV provides all this while you watch movies, TV shows and sports. It boasts a superb **Full HD** resolution (1920×1080 px), advanced **Direct LED** backlight and **high dynamic range (HDR10, HLG)** support.

To top it all off, the sharpness of the visual presentation is further enhanced by the **Progressive Scan** technology. Thanks to this improvement, the image is not displayed interlaced (in half-frames), but always straight through and feels more fluent.

Smart audio-visual entertainment

In addition to the possibility of watching classic TV programmes from **terrestrial, cable and satellite** (DVB-T2/C/S2 tuners) signals, the ECG 32FSL231 opens the door to plenty of other audio-visual entertainment. It can be connected to the internet (via cable and **LAN** connector as well as wireless via **Wi-Fi**) and is equipped with a clear **Linux** operating system. This will offer you a range of modern smart features that suit every member of your family – there are plenty of popular applications, including **YouTube, Netflix or Amazon Prime Video**.

The **mirroring function** is very practical, allowing you to easily project content from your smartphone or tablet to the TV screen.

High quality sound system

The ECG TV complements the nice picture of movies, hockey or football matches and evening news with very decent sound. Its audio system takes care of this with **integrated speakers** that operate at **2×6 W**. With the handy **equalizer with predefined programmes**, you can adjust the sound to the best possible experience of the programme you are watching.

When you don't want to disturb your surroundings while watching TV, you can also **connect wired headphones** to the device and listen to the sound in privacy.

Ready to connect

In addition to the aforementioned **headphone output**, this 32-inch Full HD TV also offers **2 HDMI ports** so you can easily connect a laptop, Blu-ray or DVD player, a game console or, thanks to the ARC technology, a soundbar. As the device's connector includes the **USB** interface, you can also play your own media from portable flash drives – many video, audio and image formats are supported.

Delighting small features

The ECG 32FSL231 is also equipped with a number of small features that can make it easier to use in both normal and non-standard situations. The first category includes the **channel list** and the **Electronic Programme Guide (EPG)** – a pair of functions that give you a perfect overview of the channels you're tuned into and their current broadcasts. More specific features include a **parental lock** (for better control over what your kids are watching) and a **basic hotel mode**, which you can use to copy the channel list to multiple TVs.

The elegant feet supplied with the TV allow it to be placed on a table or cabinet. If you prefer to hang it on the wall, however, you'll appreciate the **holder mount** set-up.
