## Television for home and caravan

A studio apartment, a cottage or a student dormitory. As well as a motor home, a boat or a caravan. The **ECG 32HSL231M** smart TV can be used at all of the above places. With a diagonal size of **80 cm (32 inches)** and the possibility of **hanging it on the wall**, it is perfectly suited for smaller interiors and offers an unusual advantage – it can be powered **from a regular socket (220 V)** as well as **from the car adapter socket (12 V)**. The scope of this attractive TV is thus extremely wide. Wherever you place it, you're in for great audio-visual entertainment, with **HD** picture quality and a number of **smart features** made available through the **Linux** operating system.

The dimensions of this compact TV are 732 × 481 × 184 mm (including the stand) and 732 × 435 × 78 mm (excluding the stand). **Adapters for 220V and 12V power supply** are included.

## Sharp images with HDR support

The 32-inch screen of our compact TV always gives you a quality display you won't want to take your eyes off. It works with **HD** resolution (1366 × 768 px), uses modern **Direct LED** backlight and supports **high dynamic range (HDR10, HLG)**, which guarantees perfect contrast in both dark and light parts of the scene.

To top it all off, this car TV enhances the sharpness of the visual presentation by the **Progressive Scan** technology. Thanks to this improvement, the image is not displayed interlaced (in half-frames), but always straight through and feels more fluent.

## Have fun smart

In addition to the possibility of watching classic TV programmes from **terrestrial, cable and satellite** (DVB-T2/C/S2 tuners) signals, the ECG 32HSL231M opens the door to plenty of other entertainment on the internet. This is because it is one of the smart TVs which allows you to use a lot of modern smart applications. With the clear **Linux** operating system, you can quickly and easily access **YouTube** videos, Netflix series and a wide range of movies from the popular **Amazon Prime Video** streaming service.

The **mirroring function** is very practical, allowing you to easily project content from your smartphone or tablet to the TV screen.

## High quality sound system

Whether you're watching a movie, a live hockey game or the news, with ECG TV you can always count on a high-quality picture, as well as a very good sound. This is taken care of by an **audio system with 2×6 W speakers**, and you can adjust the sound to the programme you're watching using the **equalizer**.

If you don't want to disturb your surroundings while watching TV, you can also **connect headphones** to the device and listen to the sound in privacy.

## Ready to connect

In addition to the aforementioned **headphone output**, our caravan TV also offers **2 HDMI ports** so you can easily connect a laptop, Blu-ray or DVD player, a game console or, thanks to the ARC technology, a soundbar. As the device's connector includes the **USB** interface, you can also play your own media from portable flash drives – many video, audio and image formats are supported.

## Parental lock and hotel mode

The ECG 32HSL231M car socket TV is also equipped with a number of small features that can make it easier to use in both normal and non-standard situations. The first category includes the **channel list** and the **Electronic Programme Guide (EPG)** - a pair of functions that give you a perfect overview of the channels you're tuned into and their current broadcasts. More specific features include a **parental lock** (for better control over what your kids are watching) and a basic **hotel mode**, which you can use to copy the channel list to multiple TVs.
