Elegant Smart TV with a fine picture

Elegant **frameless design**, sharp **HD** picture and a cutting-edge **VIDAA** operating system that opens the door to incredible amount of amazing audio-visual content on the internet. All of this comes together in the **ECG 32HSV231** – a TV that will instantly become the focal point of your home. Thanks to its popular diagonal of **80 cm (32")**, it fits perfectly into smaller spaces, so it can be used in your living room, as well as in the bedroom, kitchen or even at the cottage.

In order to use all the features of the ECG TV and the VIDAA operating system to the full, you need to connect the device to the internet. There are two ways to do it – cable (a **LAN** connector) or wireless (via **Wi-Fi**). The choice is yours.

VIDAA: a faster and clearer operating system

We have equipped the ECG 32HSV231 with the advanced and sophisticated **VIDAA** operating system which ranks among the top of TV user environments. It's **extremely fast**, so there's no delay when you're searching for your favourite audio-visual content. **It is very user-friendly** which makes it easy to navigate and you can control everything very easily. Last but not least, you'll appreciate the **wide range of smart applications** that enable you to use popular services for streaming movies, listening to music and watching sports.

Of course, there's also an **application store** where you can search easily and continually expand the functionality of your TV. There is a large number of global as well as Czech services available to you.

Netflix, intuitive remote control and mobile applications

Nothing stands between you and endless fun. The VIDAA operating system takes care of everything, so it offers the right thing to every member of your family. It offers applications from popular streaming platforms such as **Netflix, YouTube, Disney+** and **Amazon Prime Video** – the main ones can be easily accessed thanks to special **buttons on the remote control**. To make using the ECG TV even more convenient, the VIDAA operating system comes with a clear **mobile application** for easy control of the TV with your phone.

A **mirroring function** is also included; it lets you easily project content from your smartphone or tablet onto the TV screen.

Movies, series and sports in HD quality

The ECG TV works with **HD** resolution (1366×768 px) and uses modern **Direct LED** backlight. Whether you're watching a Hollywood movie, a Czech TV series, or supporting your team during a live sports broadcast, you can always count on a beautifully sharp picture.

To top it all off, the sharpness of the visual presentation is further enhanced by the **Progressive Scan** technology. Thanks to this improvement, the image is not displayed interlaced (in half-frames), but always straight through and feels more fluent.

High quality sound system

The ECG TV complements the sharp picture of movies and series, hockey or football matches and evening news with very decent sound. Its audio system takes care of that with **integrated speakers** that work with a power of **2×8 W**. In addition, you can adapt the sound to the programme you're watching with a handy **equalizer with 5 different modes**. Thanks to an **optical audio output**, you can connect external home cinema speakers to take the sound coming out of your TV to an even higher level.

Ready to connect

In addition to the aforementioned **optical audio output**, the 32-inch ECG 32HSV231 offers **3 HDMI ports** so you can easily connect a laptop, Blu-ray or DVD player, a game console and, thanks to the ARC technology, even a soundbar. As the device's connector set includes **2 USB ports**, you can also play your own media from portable flash drives – many video, audio and image formats are supported.

Delighting small features

The ECG 32HSV231 can receive TV programmes from terrestrial, cable and satellite (DVB-T2/C/S2 tuners) signals. It also comes with a number of small features that can make it easier to use in both normal and non-standard situations. The first category includes the **channel list** and the **Electronic Programme Guide (EPG)** – a pair of functions that give you a perfect overview of your tuned channels and their current programme. More specific features include a **parental lock** (for better control over what your children are watching) and a **hotel mode** that makes it easier to manage multiple TVs in your accommodation.

For greater flexibility in interior placement, the TV can be **hanged on the wall** using the VESA standard.
