ECG AC 3032 HC Dual Navy

Cooler box

Product code: 100002067259
EAN: 8592131309609

- 28 liters inner volume
- Dual power supply - car socket compatible or use in standard socket
- Cooling / Heating Function
- Fully removable top cover

- Eco function, energy class E
- Cools down by as much as 20°C below ambient temperature
- Heating function is up to 65°C with ambient temperature
- Practical 2 handle/cover positions for hands-free operation
- Quality lightweight insulation
- Practical safety lid locking by using handle
- 100% removeable cover/lid from the box
- Big traveler cooling/heating box with 28 l capacity
- Dual power supply
  - 12 V DC car socket compatible
  - Built in transformator allow use in standard 230 V socket
- Dual usage
  - Cooling function
  - Heating function
  - Outdoor temperature range for ideal use 16-32°C
  - DC Cable length 250cm
  - AC Cable length 200cm

Technical specification

Input power (W)	55
Energy efficiency class	E
Cooling	Yes
Heating	Yes
Power supply (V)	12 / 220-240

Product specification

Inner capacity (l)	28
Cooling down	up to 20°C above the ambient temperature
Heating function	up to 65°C above the ambient temperature
Power indicator light	Yes

Design

Colour	Blue/White
Material	Plastic

Accessories

Power cord	230 V, DC 12 V

Weight & dimensions

WIDTH (MM)	399
HEIGHT (MM)	432
LENGTH (MM)	300
WEIGHT (KG)	4.4

Weight & dimensions (Brutto)

WIDTH WITH PACKAGING (MM)	410
HEIGHT WITH PACKAGING (MM)	450
DEPTH WITH PACKAGING (MM)	305
WEIGHT WITH PACKAGING (KG)	5

Portable refrigerator which cools and warms

Portable refrigerator **ECG AC 3032 HC Dual** is suitable for vacation, for the beach or for a longer car trip. It will come in handy wherever there is no electricity and you would like to enjoy chilled drinks or keep a snack in the cold. However, this does not end the use of the refrigerator. Besides cooling (COLD) it has also available **heating function** (HOT), and you can heat your lunch in it.

Thanks to a capacity of 28 l, you can store chilled drinks or snacks for the whole family in the refrigerator. The refrigerator can cool down by a maximum of 20°C below the ambient temperature and heat up to 65°C above the ambient temperature. This measurement is conducted at an ambient temperature of approximately 25°C. Additionally, the product falls into the climatic class of 16-32°C (N), which means that under ideal conditions, the refrigerator can reach temperatures close to 0°C or slightly lower, while it can also generate heat approaching 80°C during heating. It is important to note that the cooling effect may be limited based on the current outdoor temperature, for example, if it is 10°C outside, the refrigerator will not achieve a cooling effect of 20°C below ambient temperature. You can easily set the COLD and HOT functions using the switch control on the back of the refrigerator. You can use the **program ECO** for maximum energy saving.

Refreshing drinks even during a long drive

When handling the contents of the refrigerator, the lid can be adjusted so that it does not fall using the two-position adjustable handle. The lid is also equipped with a safety lock.

The advantage of the cooling box is its high quality **lightweight construction** thanks to which it weighs only 4.4 kg. A practical indicator light informs you about the operation. A designated space is used to store the power cord.

The option of a dual type of power supply is an above standard option of the ECG AC 3032 HC Dual travel refrigerator. You can use the classic power supply from the 220-240 V from the electrical outlet. When traveling, 12V power comes in handy, and thanks to the 2.5-meter cable, you can easily connect this box from the cabin of your personal vehicle, even if there is no socket in the trunk.
