It conjures up perfect toast

Start your day with a perfect breakfast thanks to the **ECG ST 2708 Tradizione Nero toaster** . This elegant little appliance with **a matte black finish and stainless steel elements** will become a decoration of your kitchen, but most of all you will appreciate its first-class functionality. Its **two pastry compartments** allow you to prepare two toasts at once, perfect for quick breakfasts or snacks for the whole family. With **six levels of temperature regulation** , you have full control over how toasted your toast will be - you can choose from slightly golden to perfectly crispy. **The crumb drawer** is also useful, which makes maintenance easier - simply pour out the crumbs from the toasted bread and your toaster is clean and ready for the next use.

It bakes, heats and defrosts

This toaster uses the function **of automatic centering of the slices** , which ensures that each piece of toast is evenly toasted. ECG ST 2708 Tradizione Nero from us also comes with a useful **baking grid** , which allows you to heat or bake pastries that do not fit in classic compartments. Enjoy warm rolls, buns, bagels or croissants at any time of the day. Did you forget to do your shopping, are you running out of time and the only thing you have at home in the morning is the pastry in the freezer? No problem. **The defrost function** will help you prepare a perfect breakfast even at such a moment. If you only need to reheat already toasted bread for a short time, you can use **the reheat function again** - thanks to it, the bread will remain crispy and warm without burning.

Safety and comfort

Tradizione Nero toaster also provides safety and user comfort. **The automatic shut-off** function ensures that the toast slices are ejected by themselves after the cycle is complete, eliminating the risk of overheating. **The light signaling of the operation** informs you about the current status of the toaster, so you are always in the picture. And you will certainly appreciate **the space for storing the cable** , which facilitates storage. The toaster works with an input of **780-925 W** and is connected **to a standard socket** (the length of the supply cable is 76 cm).
