4 great sandwiches quick and easy

Do you often wonder what to prepare for breakfast, a snack or dinner? Bet on irresistibly crispy sandwiches that you can prepare for yourself and your loved ones in no time! The **ECG S 2120 Grande** sandwich maker will prepare 4 at once. The device creates **triangular sandwiches**, and thanks to its **900 W** power, heating is fast and efficient. Your favorite treat is ready in no time. The sandwich maker is very compact, so it doesn't take up too much space in your kitchen. Neither when in use nor when not in use. Its dimensions are **28 × 24 × 9 cm** and its weight is **1.55 kg**.

Non-stick surface for easy cleaning

One of the main advantages of this sandwich maker is its **non-stick surface**, which guarantees not only easy removal of sandwiches, but also simple maintenance after use. You can say goodbye to baked-on cheese and other dirt that often remains on the grill plates of other appliances. After the appliance has cooled down, simply wipe the baking surfaces with a damp cloth. You can also use a paper towel soaked in water to loosen baked-on residues.

Safety and comfort in every use

Safety features such as **heat-insulated handles** and **non-slip feet** ensure that this appliance is safe to use even at higher temperatures. The ECG S 2120 Grande sandwich maker also has practical **light indicators** that inform you about the power supply and readiness for baking. This means that you have perfect control over everything, from plugging it into the socket to serving the finished sandwiches on a plate. When it comes to safety, it is also worth mentioning the **safety lid lock**, which is a given with this sandwich maker - thanks to it, the appliance is reliably closed during the preparation of sandwiches.

Elegant design and hassle-free storage

The ECG S 2120 Grande sandwich maker not only works great, it also looks good. The **combination of black plastic and stainless steel** gives the device an elegant look that fits into any kitchen. When storing, you can simply wrap the **power cord around the bottom** of the device, saving space on the kitchen counter.
