

ECG CDR 990 DAB

CD radio

Product code: 100002126998

EAN: 8592131000513

- FM and DAB+ radio support
- Integrated CD player
- USB port for MP3 playback
- Classic cassette mechanics
- Possibility of power supply from the mains and batteries

- Digital FM tuner (with RDS technology) that enables tuning of stations broadcasting on frequencies 87.5-108 MHz

- Support for radios that use the modern DAB+ digital radio standard (frequency 174.928-239.000 MHz)
- Clear and stable signal reception thanks to the telescopic antenna
- Function of automatic tuning of available stations
- Possibility to automatically and manually store up to 30 favorite radio stations (FM and DAB) in the memory
- CD player with CD, CD-R, CD-RW and MP3 CD support
- Classic drive for playing audio cassettes
- USB port for playing audio files in MP3 format (you can connect an external storage device with a capacity of up to 128 GB)
- Possibility to program up to 20 (CD) / 99 (MP3) songs to be played in the order you choose

- Handy functions to shuffle, repeat or play the first 10 seconds of each song
- Built-in stereo speakers with a power of 2× 2 W (RMS) for quality sound
- Equalizer that allows you to adjust the sound according to the music genre or your personal preferences (NORMAL, CLASSIC, JAZZ, POP, ROCK, SPEECH modes + MY EQ... mode, which allows you to set your own treble, bass and volume correction values)
- Easy operation with a set of integrated buttons with clear labels
- LCD display that clearly shows you the current time and date as well as all important information about the operation of the radio and the content being played (in Czech)
- Option to individually adjust the brightness and dimming of the display
- Smart timer (SLEEP) and alarm (ALARM) functions, thanks to which you can fall asleep or wake up to the sound of your favorite music or radio program

- 3.5mm headphone output for private listening
- 3.5mm AUX type input for connecting external audio sources (e.g. mobile phone or MP3 player)
- Possibility of power supply from the mains (AC 100-240 V; 50/60 Hz; 16 W) and from batteries (DC 9 V – 6× 1.5 V batteries type C/LR14 – not included in the package)
- Energy-saving operation with a power consumption of only 16 W
- Automatically switch to standby mode (in case of long-term inactivity) to save energy
- Elegant design with titanium finish
- Compact design with dimensions of 298 x 230 x 128 mm
- Weight only 1.5 kg

For demanding listeners with a love for traditions

The **ECG CDR 990** is a versatile radio that combines modern digital technology with the nostalgic charm of the analog era. Thanks to the support of the modern radio standard **DAB+** and classic **FM** broadcasting, you can enjoy the crystal clear sound of digital stations while maintaining fidelity to your favorite analog frequencies. In addition, you can also play **CD** or music from a **USB** flash drive on it. In short, it is a device that represents a perfect symbiosis of tradition and modern technology - it is a radio for those who want to have the best of several worlds at once. The **Elegant titanium design** of the radio with a **compact design** (dimensions 298 x 230 x 128 mm and a weight of only 1.5 kg) makes this device a great addition to any room. And to top it off, thanks to the option of **battery power**, it will serve you well not only at home, but also anywhere in the field.

Modern digital radio and good old analog classics

Thanks to the integrated **DAB+** tuner, you can taste the future of radio broadcasting with this radio. The receiver covers frequencies of 174.928-239.000 MHz, while the DAB+ standard can provide you with significantly better sound quality without noise or interference, as well as practical additional information (displayed directly on the LCD display with the Czech menu). At the same time, support for classic **FM** radio (87.5-108 MHz) with **RDS** technology remains, so you won't lose your favorite analog stations either. You can **store up to 30 of the most popular stations** across both standards in the radio memory, which you can quickly tune in at any time without lengthy searching.

When the past comes alive thanks to tapes

Do you have a collection of old cassettes at home, which you would like to play occasionally, but you haven't been able to for a long time? The ECG CDR 990 puts them back in the game. Among today's radios, this device is a rarity - it also includes a **full-fledged cassette drive** for playing audio cassettes (MC). Whether it's recordings from your youth, rare concerts, or simply nostalgic memories stored on tape, this device lets you relive them in their full glory. Controlling the tapes is completely intuitive and you can use the buttons for play, pause and fast forward or rewind.

CD player with multi media support

The built-in **CD player** can handle not only classic **audio CD**, but also **CD-R**, **CD-RW** and **MP3 CD** discs. If you want to have full control over the playback, you will certainly be pleased with the **programming** function, which allows you to set your own order of up to 20 (CD) or 99 (MP3) songs. Last but not least, the radio gives you the practical **random playback** and **repeat** functions (of individual songs or entire albums) or the **INTRO** mode for quickly browsing the beginnings of all songs.

Digital music without compromise

This versatile radio also includes a **USB port**, to which you can connect external storage with a capacity of **up to 128 GB**. From it, you can then play extensive collections of digital songs in **MP3** format.

High-quality sound thanks to stereo speakers

The ECG CDR 990 radio is equipped with integrated **stereo speakers** with a power of **2x 2 W (RMS)**, which ensure quality sound. In addition, you have an advanced **equalizer with preset modes** for different music genres or types of content (NORMAL, CLASSIC, JAZZ, POP, ROCK, SPEECH) as well as a **MY EQ...** mode, which allows you to individually adjust the treble, bass and volume correction according to your own preferences. For private listening, use the **3.5mm headphone output**. And you can easily connect an external audio source, such as a mobile phone or MP3 player, to the radio via the **AUX input**.

Practical functions at your service

The ECG CDR 990 also has practical functions that make it not only an entertainment center, but also a useful assistant. The **Timer** (SLEEP function) allows you to fall asleep while listening to your favorite music or radio program, while the **Alarm Clock** (ALARM) function wakes you up in a similar way in the morning. The **LCD display with adjustable brightness and dimming**, which shows you all the necessary information (including the time, date and details about the content currently being played), is also a useful gadget, even in **Czech**. As for operating the radio, you can manage it on the left rear thanks to a clear set of integrated **buttons with clear labels**.

Power supply? Choose according to the situation

The advantage of this modern radio is the fact that it can draw energy from two sources. At home, you can use a convenient mains power supply (AC 100-240V), but when you are going to the cottage, garden or picnic, you simply insert 6 type C batteries and enjoy music even without an electrical outlet. At the same time, energy-saving operation with a power consumption of 16 W and an automatic function of switching to standby mode ensure that the use of energy is economical at all times.
