

ECG EDS 300763 BlackLine

Dishwasher

Product code: 100002134324

EAN: 8592131000544

- Semi built-in dishwasher with black control panel
- Large capacity (for 14 dining sets)
- 7 washing programs and 5 temperature levels
- Automatic door opening for perfect drying
- Silent operation with a noise level of only 44 dB

- Elegant dishwasher with black control panel for modern kitchens
- Capacity for 14 dinner sets, which makes this dishwasher suitable for larger households
- 7 washing programs (Intensive, Universal, ECO, Glass, 90 min, Quick wash, Rinse) and 5 temperature levels (45/50/55/60/65 °C) for precise washing of all types of dishes
- Extremely quiet operation with a noise level of only 44 dB (noise emission class B), thanks to which the dishwasher does not disturb you in any way during normal daily operation
- Extra drying option for dishes without drops and stains
- Automatic door opening system, which contributes to the perfect drying of washed dishes

- Extra cutlery compartment for efficient use of space and more efficient washing
- Energy class D with low water consumption of only 11 liters per cycle
- Adjustable upper basket height for flexible loading of dishes of different sizes
- Aquastop system for maximum safety and protection against overheating
- Half load wash function to save energy and water
- Compatibility with 3-in-1 tablets for simple dosing of all necessary preparations
- Delayed start (1-24 hours) with which you can adapt washing to your daily routine
- Practical child insurance
- Indicators that inform you about the lack of salt and rinse aid

- Optical and sound signal that alerts you to the end of washing
- Stainless steel inner surface that is resistant to corrosion
- Adjustable feet to balance stability
- The length of the power cable and supply hose is sufficient 150 cm
- Inlet and waste hose included in the package
- Cleaning ability index 1.125
- Drying ability index 1.065
- Energy consumption for 100 cycles 85 kWh
- Duration of the reference program 3:18 h
- Power supply 220-240 V (50 Hz)
- Dimensions 84.5 × 59.8 × 60 cm
- Weight 37.4 kg

Technical specifications

A dishwasher that combines elegance with performance

ECG EDS 300763 BlackLine is a semi-built-in dishwasher that adapts perfectly to any kitchen. The customer buys a dishwasher with a black control panel, and the front door can **be fine-tuned according to their own style and design** of the kitchen unit. Thanks to this, it really fits anywhere - from a modern interior to a rustic kitchen.

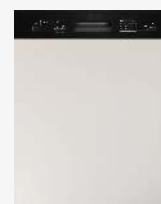

The transparent panel is located on the front side, so there is no need to open the dishwasher - everything important is right in front of you. With a capacity for **14 dining sets**, it is an ideal helper for larger households. Exceptionally quiet operation with a noise level of only **44 dB** ensures that you will not be disturbed in any way during normal operation. And a great trick is the automatic opening of the door after the end of the cycle, thanks to which the dishes will not only be perfectly washed, but also dry.

The dimensions of this dishwasher are **84.5 x 59.8 x 60 cm**.

Intelligent drying system for perfect results

Precise drying is also a very useful feature of this dishwasher. The appliance does not lack an **automatic door opening system** or a **function for extra drying**. The dishes are first perfectly dried by the residual heat inside the dishwasher, after which the door opens automatically, allowing fresh air to flow in from outside. The result is perfectly dry dishes without drops or stains, which you can immediately put away in the kitchen cupboards.

7 specialized programs

With **seven carefully tuned washing programs** (Intensive, Universal, ECO, Glass, 90 min, Quick wash and Rinse), the ECG EDS 300763 BlackLine dishwasher can easily handle different types of dishes and almost any type of soiling. In addition, the appliance can work with **five different temperature levels** (45, 50, 55, 60 and 65 °C), so the washing results are always perfect. And the **half-load washing function** is also practical, which enables efficient washing of a smaller amount of dishes - with a welcome saving of energy and water. The dishwasher is also **compatible with 3-in-1 tablets**, which greatly simplifies the dosing of detergents.

Maximum flexibility

The **Special cutlery compartment** in the upper part of the dishwasher is a smart solution for washing spoons, forks and knives. Thanks to the mentioned compartment, they have more space and are washed nicely from all sides. The **Adjustable height of the upper basket** allows you to flexibly adjust the space for taller pots or larger dishes. And practical **glass holders** ensure safe washing of fragile objects.

Advanced technologies for your comfort and safety

The **Aquastop** system provides the ECG EDS 300763 BlackLine dishwasher with reliable protection against overheating. A **child lock** protects the appliance from unauthorized use. The dishwasher's equipment also includes useful **salt and rinse aid indicators**, which alert you in time to the need for refilling.

Energy efficiency and economical operation

Despite its high capacity, the ECG EDS 300763 BlackLine dishwasher is classified in **energy class D** and consumes only **11 liters of water per washing cycle**. The reference program is completed in 3 hours and 18 minutes, which represents the optimal ratio between the cleanliness of the dishes and energy consumption.

Intuitive control and practical functions

The **Elegant black button panel** with which this dishwasher is equipped provides you with clear control of all the functions of the appliance. The **delayed start** function (with a range of 1-24 hours) allows you to schedule washing for the most convenient time. And **audio and optical signaling** reliably informs you of the end of washing.

Quality materials, elegant design and great durability

The ECG EDS 300763 BlackLine dishwasher boasts a **stainless steel interior** that is not only aesthetically attractive, but also highly resistant (especially to corrosion). And to make matters worse, quality inner baskets (in a neutral gray color) or a plastic filter are also designed for longevity. When installing the dishwasher, you will certainly welcome the **adjustable feet** (to balance the stability) and also the fact that the appliance is supplied **including the supply and waste hose**. The length of the power cable is sufficient **150 cm**.
