WEIGHT WITH PACKAGING (KG)	4,5

A smaller but well-equipped TV

Smaller, but ingeniously equipped. Such is the **ECG 32 FSV252** television, which can bring a lot of entertainment to smaller rooms thanks to its sharp **Full HD image**, fast **VIDAA operating system** and **rich connectivity options**. Its screen has a diagonal of **32 inches (80 cm)** and inside it hides a varied offer of audiovisual content from which everyone can choose. Whether you place it in a smaller living room, in the kitchen, in a cottage, or in a student dormitory, you can count on **reliable reception of all kinds of TV signals** as well as modern smart functions, from **Netflix to Oneplay**. Add to all this a tuned stereo sound and a number of useful gadgets, and you have a TV that you simply have to fall in love with.

Full HD picture that draws you into the action

This 32-inch TV works with **Full HD** resolution (1920 × 1080 px), which guarantees a sharp and sufficiently detailed image. So you can look forward to a spectacle where you can enjoy everything from the fine textures of movie scenes to small game elements. The reliable **Direct LED** backlight and the **180 cd/m²** brightness also ensure brilliant contrast, day and night. The image of this TV will pull you right into the story and you won't want to tear yourself away from it.

Fast operating system VIDAA - the smart brain of the TV

The heart of the ECG 32 FSV252 TV is the advanced operating system **VIDAA U9**, which will delight you in many ways. It starts in a matter of seconds and even then it works beautifully quickly. It also provides a **clear menu** in which you can find your way around without any problems. And most importantly, it opens the door to a whole range of popular streaming platforms and other smart services. It supports **Netflix, YouTube, Disney+, Amazon Prime Video**, and even Czech applications such as **Oneplay, Skylink Live TV, Lepší.TV, SledovaniTV** and many others.

HbbTV: interactive television of the new generation

With the **HbbTV** (Hybrid Broadcast Broadband TV) function, the ECG 32 FSV252 takes classic TV broadcasting to a new level. After pressing the **red button** on the remote control, a portal with extended content will open on your screen - you can simply switch to the archive of broadcast programs, watch exclusive videos, read current news or even watch the results of sports matches in real time.

Rich connectivity for all entertainment sources

The advantages of the ECG 32 FSV252 TV include wide connectivity options, thanks to which this device will become a versatile platform for your home entertainment. There are **two HDMI 1.4** ports (with support for ARC and CEC functions), which you can use to connect a soundbar, game console and even a laptop to the TV. **Two USB 2.0** inputs allow you to **play multimedia from a flash drive** or use the **Timeshift** function, which allows you to pause live TV and later resume it from where you left off. And of course there is also a **headphone and optical audio output** for connecting a home theater or headphones.

Without wires and with cable

You can connect this TV to the Internet in two ways. For this, you have a built-in **Wi-Fi** module for wireless connectivity and a **LAN** port, which is used for a classic cable connection.

A practical gadget is the **screen mirroring** function, which allows you to project content from your mobile phone directly onto a large TV screen.

Sound that keeps up with the action

A pair of **stereo speakers** with **2x 10 W** power supported by **NICAM** technology ensures clear dialogues and impressive bass. Using the **five-band equalizer**, you can also easily adapt the sound coming from the TV to the type of content you are watching, so it will always be perfectly clear and beautifully tuned.

Ready for any type of signal and any situation

Because this smart TV is equipped with an integrated **DVB-T2/C/S2** tuner with H.265/HEVC codec, it can receive **terrestrial, cable and satellite broadcasts in HD quality**. The presence of a **CI/CI+** composite input is a matter of course. The equipment of the device also includes useful functions such as **Parental Lock** (parental lock to protect children from inappropriate content) or **Hotel Mode** (hotel mode for safe operation of the television in a commercial environment). If you are interested, you can also attach the device to the wall - its low weight of 3 kg and the **VESA (100 × 100 mm; M4)** standard will allow you to do so.
