Deep frying? It is also healthier and with a minimum of fat

Do you like to treat yourself to a portion of fries, chicken wings or other fried goodness from time to time, but would you rather avoid traditional frying in oil? Then the **ECG AF 8000 Crusty XL** hot air fryer is just for you. Thanks to the sophisticated technology of **3D hot air circulation**, you can prepare a wide range of favorite dishes in it with a minimum amount of oil, but still retain the welcome juiciness and crispy texture. Whether you simply crave golden-fried French fries, vegetable chips, or homemade drumsticks, with this fryer you will enjoy a healthier meal with less effort.

Practical control and handy functions

One of the main benefits of the ECG AF 8000 Crusty XL deep fryer is its over-standard volume - it offers an **internal capacity of 7 liters**, so you don't have to prepare your favorite dishes more than once. The container is designed to comfortably hold a large amount of food, which is great for households with children and for situations when you host your friends. **The non-stick treatment of the container and the frying grid inside** also significantly facilitates cleaning and at the same time prevents sticking.

Practical control and handy functions

This hot air fryer is controlled via an **intuitive touch panel with a digital display**. In addition to **manual setting of temperature and time**, here you will also find a number of practical **preset programs**. The temperature can be continuously adjusted in the range **80-200 °C**, and the time **from one minute to a full hour**. There is also the possibility of a **delayed start (by 1 to 24 hours)**, thanks to which you can prepare food exactly according to the household's daily schedule. **light indicators and an acoustic signal** inform you about the operation of the fryer. After the end of the program, the device is **automatically switched off**. And you will certainly be pleased with the **possibility of interrupting the preparation** and restarting it later. In addition, the progress of cooking can be monitored through the **transparent glass window** – so you have an overview without having to open it.

Savory and sweet – programs for preparing a whole range of meals

With the ECG AF 8000 Crusty XL deep fryer, even novice cooks can achieve great cooking results. This is thanks to **automatic programs**, with which you do not have to think about how long and at what temperature the chicken or muffins should be prepared. There are fashions for **thin frozen fries, shrimp, fresh fish, beef steaks, chicken drumsticks, muffins and cakes, roasted vegetables and frozen pastries**. And as a bonus, there is a special function for **defrosting**. Each program is designed to automatically set the ideal values for a given type of food. For you, this always means a perfect result, whether it is perfectly cooked, juiciness, or a crispy crust.

Safety first

Several useful functions ensure the safe operation of this hot air fryer. A practical element is e.g. **automatic switch-off** (after the program is finished, but also if you accidentally remove the container during preparation). In addition, the fryer has a **system that prevents starting if the container is not properly inserted**. And there is also an **ergonomic handle that remains cool during operation**, so there is no risk of unnecessary burns. There are **non-slip feet** on the underside of the fryer, which provide the appliances with the necessary stability.

An indispensable helper that catches the eye at first glance

The ECG AF 8000 Crusty XL fryer boasts an input of **1700 W**, which, in cooperation with **3D hot air circulation**, ensures fast and even heating of the interior space. For trouble-free operation, simply plug the device **into a standard outlet (220-240 V, 50/60 Hz)**. The power cable is **75 cm** long, which guarantees a sufficient range without the need for an extension cord. The entire device has dimensions **38 × 34 × 33 cm** and weight **5.2 kg**. It looks homely, yet still compact enough to fit even in medium-sized kitchens. The stylish **design with stainless steel and black-silver surface** fits into modern and classic interiors, so the fryer will do a great job in any home.
