A reliable helper for everyday cooking

The stick blender **ECG RM 100 Lite White** is a practical kitchen helper that can greatly facilitate the preparation of a wide range of meals. Thanks to the **powerful 400W motor**, it can handle mixing soups and sauces, preparing baby food and making smoothies. Its **stylish white-green design** will give your kitchen a fresh and modern look. And the **extra long power cable** ensures that you can work further away from the socket.

Powerful engine and Turbo function

At the heart of this immersion blender is a reliable **400W motor** that provides enough power to handle all common kitchen tasks. At the same time, you also have a practical **Turbo** button at your disposal, which allows you to quickly activate maximum power - for example, when grinding tougher ingredients. The mixer motor also has built-in **overheating protection**, which automatically switches off the device in case of excessive load. So you can mix without worrying about safety.

Quality stainless steel components

All parts that come into contact with food are designed with an emphasis on long service life and maximum hygiene. **Stainless steel blades** ensure efficient blending, high durability, and easy maintenance after every use. Stainless steel is also resistant to corrosion and does not absorb odours or flavours, making it an ideal material for blending blades. The **removable blending attachment** then makes handling and subsequent cleaning easier.

Maximum freedom of movement

The advantages of the ECG RM 100 Lite White stick mixer also include an **extra long power cable**. It measures a full **2 meters**, which gives you complete freedom of movement throughout the kitchen without being limited by the proximity of an electrical outlet. You can mix comfortably at the stove, at the kitchen island or even at the sink.

Lightweight and ergonomic design

With a weight of only **0.59 kg**, this immersion blender is among the lightest in its category. The **Ergonomically shaped handle** also ensures a comfortable and safe grip. And the compact design with dimensions **37,0 × 6,7 × 6,7 cm** allows easy storage in any kitchen cabinet or drawer. Bottom line: this blender is not only reliable and efficient, but also lightweight, user-friendly and very compact, so you can't leave it in the kitchen.

Simple operation

The mixer ECG RM 100 Lite White was also designed with an emphasis on ease of use. Its **control is very intuitive**, so every member of the family can handle it - just plug it into the mains, immerse it in a container and press the button. You can also use the Turbo button for more intense performance. Nothing else needs to be complicatedly studied or set up. You can thus fully enjoy the advantages of fast and efficient preparation of your favorite dishes. In addition, you will definitely appreciate the **easy maintenance** of the mixer (just wipe the top with a damp cloth, you can wash the bottom in warm soapy water - you can find detailed cleaning instructions in the manual).
