Hand blender with a wide range of accessories

The stick blender **ECG RM 100 Max Black** is a practical kitchen helper that can greatly facilitate the preparation of a wide range of meals. Thanks to the **powerful 400W motor** and **mixing container with measuring cup and lid**, you can conveniently mix soups and sauces or prepare baby food in it. The **Whisk Whisk** allows you to make creams and snow from egg whites. And since the supplied accessories also include a **food chopper**, you can also easily chop meat, cheese, onions or even almonds. In short, the scope of this mixer is very wide. Thanks to the **elegant black design**, the mixer fits in with any kitchen equipment without any problems.

Powerful engine and Turbo function

At the heart of this immersion blender is a reliable **400W motor** that provides enough power to handle all common kitchen tasks. At the same time, you also have a practical **Turbo** button available here, which allows you to quickly activate maximum power - for example, when grinding tougher ingredients. The mixer motor also has built-in **overheating protection**, which automatically switches off the device in case of excessive load. So you can mix without worrying about safety.

Quality stainless steel components

The removable blending attachment is designed for comfortable use and easy cleaning, while the **blending blades themselves are made of stainless steel**, ensuring long service life, maximum hygiene during blending, and high durability for everyday use. Stainless steel also does not absorb odours or flavours and is resistant to corrosion, making it an ideal material for blending blades.

Maximum freedom of movement

The advantages of the ECG RM 100 Max Black hand mixer also include an **extra long power cable**. It measures a full **2 meters**, which gives you complete freedom of movement throughout the kitchen without being limited by the proximity of an electrical outlet. You can mix comfortably at the stove, at the kitchen island or even at the sink.

Lightweight and ergonomic design

This immersion blender also boasts a **low weight** and an **ergonomically shaped handle**. It fits comfortably in the hand and handling it is extremely comfortable even during mixing itself. The compact design (with dimensions of 370 × 67 × 67 mm) allows the mixer to be easily stored in any kitchen cabinet or drawer. Bottom line: this blender is not only reliable and efficient, but also lightweight, user-friendly and very compact, so you can't leave it in the kitchen.

Simple operation

The ECG RM 100 Max Black mixer was also designed with an emphasis on ease of use. Its operation is very intuitive, so every member of the family can handle it - just plug it into the mains, immerse it in a container and press the button. You can also use the Turbo button for more intense performance. Nothing else needs to be complicatedly studied or set up. You can thus fully enjoy the advantages of fast and efficient preparation of your favorite dishes. In addition, you will definitely appreciate the easy maintenance of the mixer (just wipe the top with a damp cloth, you can wash the bottom of the mixer and the container in warm soapy water - detailed cleaning instructions can be found in the manual).
