

ECG KM 1500 Medio

Electric coffee grinder

Product code: 100002148357

EAN: 8592131001190

- High-quality stone grinding mechanism
- Capacity 240 g coffee beans
- 18 levels of grinding coarseness adjustment
- Coffee quantity selection (2-12 cups)
- Powerful 150W motor

- Powerful 150W motor for fast and efficient coffee grinding
- Capacity of 240 g of beans, which is enough to prepare coffee for several cups at once
- Container that holds up to 140 g of ground coffee
- 18 levels of grinding coarseness adjustment guarantee great flexibility (suitable for preparing coffee for everything from espresso to filtered coffee to French press)
- Option to select the amount of coffee (in cups: 2-12 servings)

- Easy operation with rotary selectors and ON/OFF switch
- Automatic shutdown after grinding the selected amount of coffee and the option of manual stop
- Stone grinding mechanism for even and high-quality grinding without overheating
- Transparent elements through which you can monitor the grinding process
- Stable anti-slip pads that prevent the grinder from moving on the kitchen counter

- Overheating fuse that automatically turns off the grinder in case of overload
- Compact design with dimensions of 25.5 × 13.5 × 19.2 cm
- Low weight of 1.2 kg
- Sufficient cable length of 80 cm
- Easy maintenance and easy cleaning of all removable parts
- Stylish black design made of high-quality plastic and stainless steel
- Connection to a standard outlet (voltage 220–240 V; frequency 50–60 Hz)

Technical specifications

Input power (W)	200
Voltage/Frequency (V/Hz)	220-240 V~ 50/60 Hz
Grind system	stones
Power Cord length (cm)	80

Product specifications

Coffe beans capacity (g)	50
Stainless steel blades	No
Grinder setting	Yes
Digital display	No
Transparent lid	Yes
Non-slip feet	Yes
Power Cord	No

Design

Colour	Black
Material	Stainless/Plastic

Accessories

Power cord	Yes
Plastic cover lid	Yes

Start your day with freshly ground coffee

The **ECG KM 1500 Medio** coffee grinder is a welcome companion for all lovers of high-quality, freshly ground coffee. Thanks to its **compact design** and **elegant black finish**, it will fit into any kitchen without any problems and will become an indispensable assistant for your daily coffee ritual. Start your morning the way you like it – with the aroma of authentic and perfectly prepared coffee from the ECG KM 1500 Medio grinder. With a capacity of **240 g of beans**, this grinder has enough space to prepare coffee for several cups at once. The second container can hold **up to 140 g of already ground coffee**.

Powerful grinding

The driving force behind this grinder is a **powerful 150W motor**, which ensures reliable and efficient grinding of coffee beans. The **stone grinding mechanism** also grinds coffee beautifully and evenly - no matter what beans you prefer. So you can count on consistent quality in every cup. The motor works safely and without excessive heating, while the **overheating fuse** automatically switches off the device if necessary (if the tolerable operating temperature is exceeded).

18 degrees of coarseness: a great choice for all preparation methods

The key advantage of the ECG KM 1500 Medio grinder is **18 levels of grinding coarseness adjustment**. Thanks to them, you can prepare coffee in many ways. The grinder easily conjures up ground coffee for a lever or automatic coffee maker, as well as a cezve, aeropress, drip, vacuum pot or moka pot.

Convenient and intuitive control

The ECG KM 1500 Medio grinder is extremely simple and intuitive to use. **Just pour the beans into the hopper, select the grinding coarseness and number of cups, press the ON/OFF button and leave the rest to the grinder.** The work only takes a few seconds, and once it is finished, the grinder automatically turns off (if you want to stop grinding earlier, just press the power button again).

Perfect stability

Stability is essential during grinding. That's why the ECG KM 1500 Medio has **anti-slip pads** that ensure a firm position during the entire grinding process. This means that the device stays securely in place, no matter how vigorously the motor is working.

Quality workmanship

The combination of **stainless steel and high-quality plastic** guarantees that this grinder will serve you reliably for a very long time. Stainless steel parts resist corrosion, while plastic components are lightweight and hygienic. With dimensions **25.5 x 13.5 x 19.2 cm** and a weight of only **1.2 kg**, the ECG KM 1500 Medio grinder is a compact device that can be used even in smaller kitchens. The grinder connects to a standard household outlet with a voltage of 220–240 V and a frequency of 50–60 Hz. The cable length is **80 cm**, which gives you a comfortable reach around the kitchen without the need for extension cords or power strips.
