A modern radio that you always have at hand

Are you looking for a radio that you can easily take anywhere with you? Then the **ECG RD 250 DAB Black** is exactly the right device for you. It is a **compact portable radio** that can keep you company at home, at the cottage, or even outdoors in the garden. Thanks to its **low weight** (only **390 grams**) and **small dimensions** (just **160 x 54 x 100 mm**), you can easily pack it into any backpack or bag. You can listen to **FM** and **DAB+** radio stations and even **stream music from your mobile phone**. The built-in **Li-Ion battery** provides power even in places without a power socket. The device also boasts an **elegant black design**, so you will love it at first sight.

Digital listening in perfect quality

Compared to older analog radios, the ECG RD 250 DAB Black differs by a major innovation. It is equipped with a **digital tuner** and can receive not only stations broadcasting in the **FM** band, but also radios using the modern **DAB/DAB+** standard. This ensures high-quality reception with clear sound. You will also appreciate the fact that **DAB+** broadcasting is more resistant to unwanted interference. The device offers **memory for 40 stations in the DAB+ standard and another 40 for the FM band**, so you can save all your favorite radios. Then all it takes is one press of a button and the exact station you want starts playing. Everything can be easily controlled using **simple buttons** and a clear **Matrix LCD display**, which provides all important information (including data about the broadcast content, station, or current time).

Telescopic antenna for reliable reception

The basis of uninterrupted listening to music and spoken word is high-quality signal reception. That is why the ECG RD 250 DAB radio is equipped with a **telescopic antenna** that you can adjust as needed. By properly positioning and extending it, you can easily ensure optimal reception – whether you are tuning your favorite station at home, at a cottage, or on the terrace in front of your house.

Wireless streaming of music or podcasts

Nowadays, most people have their favorite music stored on their phones. That is why the portable ECG RD 250 DAB Black radio also offers **wireless BT streaming** of music, podcasts, audiobooks, or other audio content – whether from a smartphone, tablet, or another compatible device. No cables, no complications. The wireless connection range is approximately **10 meters**.

A battery that keeps up with your plans

The ECG RD 250 DAB Black will not disappoint you in terms of battery life either. The built-in **lithium-ion battery** with a capacity of **1900 mAh** provides this portable radio with **up to 6 hours** of continuous operation. And when it runs out? Charging takes 4–6 hours and is done via the modern **USB-C** interface (the adapter is included in the package).

Alarm clock as a practical additional function

With this compact radio, you can also **set up two alarm times**. Each alarm can be set as a one-time alarm, for weekends only, for weekdays only, or for daily repetition – the choice is yours. You can also choose whether you want to wake up to a classic buzzer sound or to your favorite radio station.

Falling asleep to the radio

Do you like listening to the radio before falling asleep, but don't want it to play all night and drain the battery unnecessarily? Then you will appreciate the **Sleep Timer** function, which ensures the device **automatically turns off** after 15, 30, 45, 60, or 90 minutes. You can fall asleep without worries and sleep peacefully until morning.

Quality sound in a compact package

Although the ECG RD 250 DAB Black radio is extremely compact, it will also impress you with its clear sound. It operates with an output power of **1.8 W**, which is perfectly sufficient for a small device of this type. The sound is clean, balanced, and loud enough for everyone in the room to enjoy. If you want to enjoy listening to the radio in private, you can **connect classic wired headphones** to the device – a **3.5 mm jack connector** is available for this purpose.

Equalizer with preset audio modes

The ECG RD 250 DAB Black offers an **equalizer with 5 preset audio modes**: Flat (neutral setting), Rock (enhanced bass and mid frequencies for rock music), Pop (optimized for popular music), Jazz (softer tuning for jazz), and Classic (ideal for classical music). This allows you to easily adjust the sound to the genre you are currently listening to. There is also a practical **DRC** (Dynamic Range Compression) function that automatically equalizes volume differences between individual stations.
