Strong performance without compromise

The VT 8700 Dusty stick vacuum impresses at first glance with its combination of power and comfort. A powerful **350 W BLDC motor** combined with suction power of up to **20 kPa** easily handles dust, crumbs, and larger debris. Thanks to three power levels (**8 / 15 / 20 kPa**), you can easily adjust cleaning exactly to your needs.

Maximum hygiene and smart emptying

Advanced filtration with a **HEPA H11 filter** helps capture fine dust and allergens, which every household will appreciate. Bagless operation combined with a **self-emptying station** means less hassle and more convenience. The generous bag capacity in the station of **1.7 l** also allows for longer use without frequent emptying.

Endurance, control and wireless freedom

The vacuum is powered by a **Li-ion battery (2200 mAh, 22.2 V)** that offers up to **35 minutes of operation** on a single charge. Thanks to this, you can clean your entire home without interruption. A practical **battery indicator** always shows the current status, and the charging time of **4.5 hours** ensures quick readiness for the next cleaning.

Thoughtful design and practical features

Every detail is designed for maximum comfort. The **telescopic metal tube** adjusts to your height, while **rotating brushes** ensure efficient cleaning of various surfaces. A **2-in-1 crevice tool** is also included for hard-to-reach places. Thanks to the **charging base** and **parking position**, storage is quick and easy, just like everyday use.
