Home grilling made easy

With the **ECG KG 90** contact grill, you can easily prepare meat, vegetables, sandwiches, panini and quick family dinners at home. Thanks to **2000 W** power, the plates heat up quickly so you can start cooking without a long wait. The grill is suitable for **grilling, baking and BBQ cooking**, so it adapts to whatever you feel like preparing.

Three positions for different meals

The practical design allows use in **3 positions**. The closed mode is ideal for panini, sandwiches or meat cooked from both sides. You can keep the top plate at 90° for classic grilling, or open the grill fully to create a larger BBQ surface. This makes it easy to prepare several types of food at once.

Temperature under control

With the **thermostat control**, you can easily set the temperature according to the food you are preparing. The **170–240 °C** range is suitable for gentle baking and more intensive grilling of meat. Clear **POWER** and **READY** indicators show switching on and plate heating, making cooking more comfortable and predictable.

Non-stick surface and cleaner cooking

The grill plates have a **non-stick surface** that makes food preparation and cleaning easier. The practical **drip tray** collects excess fat and juices, helping to keep your worktop cleaner. Heat-insulated handles, anti-slip feet and the residual heat function add extra comfort during use.
