Styling with volume and natural waves

With the **ECG HS 4600 Modifica WaveBrush** round heated brush, you can easily add volume, shape and soft waves to your hair. The practical round barrel helps lift hair at the roots while shaping lengths and ends. It is ideal for quick everyday styling when you want a neat result without using several separate appliances. The result can be smoother, airier and naturally polished hair.

Temperature tailored to your hair

Thanks to **5 temperature levels**, the brush can adapt to what your hair needs. You can choose **130, 150, 170, 190 or 210 °C**. Lower settings suit fine, bleached or more sensitive hair, while higher temperatures are useful for thicker and stronger hair. Clear **LED indicators** show the selected setting at a glance.

Smarter styling with an ionizer

During styling, you will appreciate the **ionizer**, which helps hair look smoother and more polished. The brush also offers a **memory function**, so it remembers the last used setting for the next session. It reaches the selected temperature in approximately 3 minutes, so you can start styling quickly. **Overheating protection** also supports safer operation.

Comfortable use at home and on the go

ECG HS 4600 Modifica WaveBrush is designed for easy everyday styling and quick touch-ups. The **swivel cord** helps prevent tangling while moving around your head, and the 180 cm length gives you comfortable freedom. The practical **hanging loop** makes bathroom storage easier. A travel pouch is also included, so you can take the brush with you.
