Smoother hair without complicated styling

The **ECG HS 4800 Modifica StraightBrush** hair straightening brush is a practical helper for everyday styling when you want to smooth your hair quickly and give it a neater look. It combines comfortable brushing with the effect of heat, so working through individual strands feels more natural than with a classic flat iron. The **double-row brush** helps guide the hair more easily, while the flat design supports straightening from roots to ends.

Temperature tailored to your hair

Every hair type needs slightly different care. That is why the ECG HS 4800 Modifica StraightBrush offers **9 temperature levels** within a range of **140–220 °C**. Lower temperatures are suitable for finer hair, while higher levels help with thicker or less manageable strands. The clear **LED display** shows the current setting, and the practical lock button helps prevent unwanted temperature changes during use.

Ion care for a smoother finish

A better-looking result is supported by the **ionizer**, which helps reduce frizz and promotes a smoother hair appearance. The **ceramic coating** supports gentler gliding through the strands, while the dual **PTC heater** helps maintain stable heat. This makes the brush suitable for quick morning styling, final touch-ups before leaving home and regular use in your beauty routine.

Comfort at home and on the go

You will also appreciate practical details during styling. The **swivel power cord** with a length of 180 cm gives you more freedom of movement, and the hanging loop makes storage easier. Safety is covered too - there is **overheating protection** and automatic switch-off after about 60 minutes. A **travel pouch** is also included, so you can take your favourite styling tool with you.
