Café-style waffles whenever you feel like it

With the **ECG S 2000 Sweet Waffle White** waffle maker, you can easily prepare a sweet breakfast, a quick dessert or a fragrant afternoon treat at home. The appliance makes **5 waffles at once**, making it ideal for family moments, guests and weekend indulgence. Thanks to its **1000 W** input, it heats up quickly, so fresh waffles are ready in no time. Just pour in the batter, close the lid and let your kitchen smell like your favourite café.

Baking adjusted to your taste

Some people like their waffles soft and light, while others prefer them crispy and more golden. That is why the appliance offers an **adjustable baking time of 2–6 minutes**, so you can fine-tune the result easily. The rotary control lets you adapt the baking intensity to the batter and your taste. Indicator lights clearly show operation and baking readiness. This keeps preparation under control from preheating to the final batch.

Non-stick plates for easy preparation

The baking plates feature a **non-stick surface finish**, making the finished waffles easy to remove while keeping their shape nicely intact. Preparation is more comfortable even when baking a larger amount of batter. The non-stick surface also makes wiping and maintenance easier after use. The closed design helps spread the batter evenly into individual waffle shapes. Once baked, you can serve them straight away or top them with fruit, chocolate or whipped cream.

Practical design for every kitchen

ECG S 2000 Sweet Waffle White combines **white colour and stainless steel**, so it also looks good on the kitchen counter. Comfortable use is supported by the **heat-insulated handle**, which makes opening and closing the lid easier. Cord storage helps keep the cupboard or worktop tidy. Its compact dimensions are practical for smaller kitchens and for spaces where you do not want an appliance permanently on display. It is a handy helper for sweet breakfasts, desserts and quick homemade treats.
