Two baskets, more possibilities

Want to prepare a main course and a side dish without deciding which one should go into the fryer first? The **ECG AF 10600 Dual Stack** hot-air fryer features **two separate 5-litre baskets**, allowing you to cook different foods at once. Their vertical arrangement makes practical use of your kitchen counter space. With a **combined capacity of 10 litres** and **2200 W power input**, it is ready for everyday family meals.

Your favourite dishes at a touch

From homemade fries and chicken wings to fish, beef and pizza, you can choose from **9 automatic programmes**. There are also options for nuggets, cakes, small pastries and **drying fruit**. Simply select a basket, choose a programme and start cooking using the **digital touch control panel**. Separate **LED displays** show the cooking temperature and remaining time, so you can follow both dishes at a glance.

Individual settings for each basket

Different foods call for different cooking conditions. That is why you can **set the programme, temperature and time independently** for the upper and lower baskets, and use either one or both together. Standard programmes reach temperatures of up to **200 °C**, while the fruit-drying programme offers gentler settings from **40 to 90 °C**. The convenient timer adapts to the selected mode and can run for up to **720 minutes** when drying fruit.

Easy cooking and convenient cleaning

Hot-air circulation lets you prepare favourite dishes **without having to add oil**. The removable baskets feature a **non-stick coating** for easier handling and cleaning. Pull out a basket during cooking and that basket pauses automatically, then continues when reinserted. **Heat-insulated handles**, non-slip feet and an audible end-of-programme signal make everyday use even more convenient.
