

# ECG FORZA 7800 Ultimo Scuro

## Kitchen robot

Product code: 100001760503

EAN: 8592131308893

- A powerful food processor for a large family
- Extra large mixing bowl (8 l) made of SUS 304 stainless steel
- High-performance motor with 1800 W power
- Large whisks that reach the bottom of the bowl when kneading
- Touch control panel with clear LED display

- Mixing bowl with an extra large volume of 8 l (made of high-quality SUS 304 class stainless steel)
- Removable transparent cover with hole
- Powerful motor (AC) with copper winding
- High-performance motor with 1800 W power
- PCB processor, which ensures a slow start-up of rotations and their subsequent stability
- High-quality all-metal gears
- Planetary rotation for perfect mixing of all ingredients (the attachments rotate simultaneously around their own axis and around the axis of the gearbox)

- 6 speeds with control using a large rotary switch
- Special pulse mode
- Touch control panel with clear LED display
- Timer function to achieve an accurate result
- Low noise (68-75 dB)
- Kneading hook, whisk, stainless steel whisk, rubber whisk with spatula for mixing creams
- Meat grinder with 3 replaceable discs for grinding different types of meat
- 6 interchangeable plates with a shaper for shaping pasta

- Attachment with a cookie or shortbread cutter
- Drum grater (with 3 replaceable stainless steel attachments)
- Tamper with space for storing small accessories
- Powerful mixer with a 1.5 l glass container
- Robust aluminium body with vibration and shock elimination
- Lifting mechanism with safety switch
- Non-slip feet with suction cups for a stable positioning
- Option to purchase a special Pasta, Lasagne, Fettuccine maker (Pasta, Lasagne, Fettuccine Maker)

## Technical specification

Power (W)	1800
Voltage (V/Hz)	220-240 ~ 50/60
Power supply type	Cord
Cable length (cm)	115
Overheating protection	Yes

## Product specification

Number of speeds	10
Pulse stage	Yes
Number of containers	1
Type of containers	Stainless
Container capacity (l)	8
Kneading function	Yes
Mixing function	Yes
Whipping function	Yes
Chopping function	Yes
Juicing function	No
Ice crushing function	Yes
Filling sausages function	Yes
Kebbe function	Yes
Pasta shapers	Yes
Grinding function	Yes
Grating function	Yes
Safety lock	Yes
Suitable for washing in the dishwasher	No
Noise (dB)	68
Anti-slip pads	Yes

## Design

Colour design	Stainless steel, black
Material	Stainless steel, metal

## Accessories

Attachments	3
Containers	Large bowl 8l

## Weight & dimensions

WIDTH (MM)	239
HEIGHT (MM)	355
LENGTH (MM)	395
WEIGHT (KG)	11.4

## Weight & dimensions (Brutto)

WIDTH WITH PACKAGING (MM)	400
HEIGHT WITH PACKAGING (MM)	285
DEPTH WITH PACKAGING (MM)	
WEIGHT WITH PACKAGING (KG)	11.4

## A robot for advanced chefs

Allow us to introduce you to the **flagship of our kitchen robots**. It is called **ECG FORZA 7800 Ultimo** and it will excite you in many ways. You can easily and quickly knead dough, mix cake cream and even grind meat with it. You can use also **many practical accessories** with it, which make the robot a truly versatile helper.

The advantages of our premium kitchen robot also include an **extra-large mixing bowl** (volume 8 l), **simple controls** and last but not least, trouble-free operation. This is taken care of by high quality **all-metal gears** together with **powerful motor made of pure copper**.

## Precise combination of ingredients

We made the bowl of the ECG kitchen robot from **high-quality stainless-steel** class SUS 304 and then added a **transparent removable cover with feeding tube**. Using it, you can gradually add individual ingredients when making your favourite dishes – their thorough mixing is then ensured by **whisks, which thanks to their length, reach the bottom of the bowl**, thus eliminating unwanted dead spots during kneading and mixing.

In addition, the robot works with a unique **planetary rotation** system, during which the attachments rotate around their own axes and around the gearbox axis. The combining of ingredients thus becomes flawless.

## Everything in the kitchen is under your control

Whether you're preparing a traditional Sunday dessert, grinding beef, or preparing homemade pasta, with the premium ECG FORZA 7800 Ultimo robot you have everything going on in the kitchen under control. You can handle its operation easily, thanks to the **touch control panel** with clear **LED display** and you also have available a **large rotary switch**, with which you can easily regulate speed – the robot offers **6 speeds** and also a special **pulse mode**.

The timer function is also very practical, since you can set with it the exact time for which your kitchen robot should work. When, for example, you are making whipping cream, you don't have to worry about over-whipping it, so to speak, by preparing it for too long - you simply set the optimal whipping time and you can count on a perfect result.

## Ready for your gastronomic arts

The ECG food processor will help you with many different recipes. We have also included a diverse collection of practical accessories that extend its functionality even further. You can use **kneading hook for dough, whipping whisk, stainless steel whisk or rubber whisk with a spatula** to mix creams. You will also find in the basic package a **meat grinder** with 3 replaceable discs (for different grinding coarseness), **drum grater** with 3 replaceable stainless-steel attachments or a **powerful mixer** with 1.5 l glass jar. Last but not least, you have also available a special **cookie or shortbread cutter**, **6 replaceable plates for shaping pasta** and practical **tamper** with space for storing small accessories.

If you are among the fans of Italian cuisine, you will certainly be pleased with the option of purchasing a special pasta maker (Pasta Maker).

## Safety first

All gastronomic activities that you undertake with the ECG FORZA 7800 Ultimo kitchen robot will be carried out in the spirit of safe operation. The appliance is equipped with a top **PCB processor**, which ensures a slow start of rotations and their subsequent stability. Its **robust aluminium body** together with **anti-slip feet** and suction cups **eliminates vibrations and shocks**. A trouble-free operation is guaranteed by **gearbox covers, lifting mechanism with safety switch** or special **mechanisms preventing an accidental start** when the appliance is open.

In addition, the motor of the robot is equipped with a **thermal fuse** protecting the appliance from an overload and possible damage.
