

ECG Mr. Fan

A 3-in-1 portable fan with a water mist spray feature

Product code: 100001915345

EAN: 8592131309401

- Improves climate of the room
- Summer fan feature
- Air humidification using the water mist spray feature
- Ionization that cleans the air
- Timer for up to 9 hours

- Improves climate of the room
- Three features in one: summer fan, air humidifier (water mist spray feature), ionizer
- The fan and the water mist spray feature function independently

- Water tank with a volume of 2,5 l
- 3 fan speeds: low, medium, high
- 180° air circulation
- Propeller diameter of 28.5 cm
- Timer for up to 9 hours

- LED display
- Remote controller
- Useful warnings about lack of water
- 4 double wheels for easy handling
- Power input of 70 W

For a more pleasant atmosphere

ECG Mr.Fan is an elegant device that offers **3 functions**. They all have the same common purpose – to make your living room, bedroom or office climate more comfortable. In the summer, you can use this nice gadget as a **fan** to disperse the hot air, cooling you down nicely. If you're dealing with dry air indoors, you'll appreciate the option of **spraying water mist** to moisten the surrounding air. And thanks to the **ionisation** function, this device can also serve as an air purifier which will rid the room of micro dust, pollen and cigarette smoke.

Because we have given this 3-in-1 device a **modern and very elegant design**, it can become a decoration in any room. Easy handling is ensured by **4 double castors**.

Warms and humidifies the air

The **fan and spraying water mist functions are independent of each other**, so you can use them both at the same time. This will be especially welcome on hot summer days when their cooperation will refresh you pleasantly. This allows you to stir up the stagnant air in the room in a desirable way while humidifying it for better breathing.

To spray the mist, the machine uses water which is filled into a **2.5 litre tank**. The device **itself will alert you** in case of water shortage. The fan provides **180° air circulation**, has a **28.5 cm diameter propeller** and offers **3 rotation speeds**.

Better breathing thanks to ionisation

Enjoy fresh air that will help you breathe better. The ECG Mr.Fan provides this through its advanced **ionisation function**. It is a principle in which the air is enriched with negative ions which accelerates the clustering of miniature dust particles. This leads to effective air purification that gets **rid of bacteria and viruses, pollen and unpleasant odours**.

In addition, the negative ions generated by our air purifier fan have a positive effect on human health – they can make you feel refreshed and reduce fatigue and stress.

Anyone can operate it

You can operate the ECG portable fan very easily. The device is equipped with a clear **LED display** and you also get a handy **remote control**.

For all three functions offered by this device, you can also use the **timer** which ensures automatic shutdown after a selected time (up to 9 hours).
